**Interaction and Mentoring Session
4 Semester**

On 1 February 2023, an interaction and mentoring session was conducted by Dr. Liansangmawii Chhakchhuak, 4 Semester class in-charge and Head. There was a one-on-one interaction with each of the students ; previous academic performances were reviewed and discussed with the students, motivating them to aim for higher grades in the following semester examinations. Mentoring and guidance was also given towards their future goals and plans.

The interaction helped in understanding the personal, family, socio-economic background of each student which would give an insight on how to give a personalised guidance to each and every student. All the students of 4 semester, Biotechnology students were involved, and the interaction session helped in identifying slow learners and advanced learners.
