

Inter Departmental Activity

The faculty members from physics department visited Lungleng village along with teachers from Mathematics and Statistics departments on 28th April 2016. The aim of the visit was to foster scientific temperament in the students of the village and inspire them to pursue higher studies in science. The faculty members visited the different schools in the Lungleng village and conducted an interactive career awareness session with school students. The faculty members also impressed on the students the need for thorough study and to not be complacent in their studies.
