

## Astronomical Observations

The department organized an Astronomical observation programme for two nights on 10<sup>th</sup> and 25<sup>th</sup> February, 2017 under the supervision of Dr. Lalhriatzuala. The astronomical observations were carried out by using the departments own telescope setup atop the academic block-1.

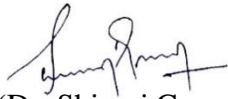

On 10<sup>th</sup> February 2017, Lunar Crater observation was carried out while Jupiter observation was done on 25<sup>th</sup> February 2017.

### PHOTOPRAPHS OF ASTRONOMICAL OBSERVATION

**Venue: Academic Block-I roof top, Lat:23°43'3702"N, Long:92°43'295"E, Time: 8 pm**

The astronomical camp generated huge enthusiasm among the students. The students who belonged to various departments of the college apart from our own Physics department enjoyed gazing the sky through the telescope. The students were amazed as the views of Lunar crater and the surface of Jupiter unfolded in-front of their eyes. Some of the enthusiastic faculty members also attended the program and enjoyed the view.
