

A Report on National workshop

On

'Basic techniques in Animal Cell Culture and Immunology'

Organized by

DBT – Advanced Level State Biotech HUB
Department of Biotechnology
Mizoram University, Aizawl, Mizoram

A training programme on '**Basic techniques in Animal Cell Culture and Immunology**' was organized by DBT – Advanced Level State Biotech HUB, Department of Biotechnology, Mizoram University for 6th Semester, B.Sc Biotechnology, Pachhunga University College. The programme was held from 16th to 17th September 2018.

The students had exposure to research laboratory set up in the department. They were accompanied by their teacher Dr. K. Lalrinzuali. The sessions covered training in different biotechnology techniques. The resource person was Dr. Vabeiryureilai Mathipi, research associate.

Lecture cum demonstration sessions were held covering topics on animal cell culture techniques, morphological observation of different cell types, maintenance of animal cell culture. Instrumentation and guidance were given to students.

The topics covered were part of their Animal Biotechnology practical syllabus and the 6th semester students of Biotechnology gained a lot of practical knowledge from the sessions and gave them a deeper understanding on the various techniques and theoretical lectures in their
