

**DEPARTMENT OF MATHEMATICS
PACHHUNGA UNIVERSITY COLLEGE**

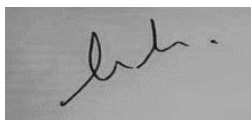

SEMINAR ON DATA-BASE MANAGEMENT

Dated July 29,

2016

Seminar on Data-base Management has been organized on July 29, 2016. This Database is the property of the College, and the department of Mathematics is only looking after it for it is developed by our HOD Mr. L. Thangmawia who spared many hours for its creation and its further development.

At the moment 16 different departments are properly link with this software and only 5 departments are left to utilize the database. Also 3 reputed colleges in Aizawl namely Govt. Aizawl College, Johnson College and T. Romana College are using the very database created by Mathematics department and acting as a consultant to these three Colleges and earn a few credit for our College. This database can handle upto 2GB free of cost, from 2011 all the students important data have entered and that till now only 95 Mb have been used. It seems that it can use it for atleast 20 years. It is very useful for the students entry as well as for the teachers' record. In the first session Mr. L. Thangmawia talked about students database management, and followed by Dr. LP Lalduhawma describing the use of it for the teacher side. After that a discussion and practical work followed.

(Dr. LP LALDUHAWMA)
