

Student Counselling and Mentoring

Department of Biotechnology Pachhung University College

13 October 2016

The department of Biotechnology practices tutor-mentor system and provides career counselling and guidance to students for academic performance improvement. This is practised religiously by all teachers wherein, students under their care are being monitored and counselled after every internal exam.

On 13th October 2016, counselling and mentoring session was held for students. Efforts are made towards understanding students' family background, availability of study environment at home, financial or health issues if any.

Counseling and Mentoring by Dr.PC Lalrinfela

Counseling and Mentoring by Dr.Liansangmawii Chhakchhuak

This system has helped in understanding the students background and cause of low performance in unit tests and internal exams, thus providing teachers to come up with new techniques to help and guide weaker students and advanced students according to their needs.
